

Home Visit Policy

At The Life Nursery we offer home visits for every child starting with us. The Manager or Deputy Manager will attend a home visit with an Early Years Practitioner. Staff will never attend a home visit alone.

The aims of a home visit are:-

- To meet with the child and their family
- To begin to form attachments between staff, parents/carers and the child
- To form partnership working with parents/carers
- To ask questions and gain information, such as the child's 'likes, dislikes, medical history, food preferences'
- To complete an in depth 'All About Me' document
- To give parents/carers an opportunity to share information about their child and discuss any concerns/worries that they may have
- Give staff the opportunity of providing parents/carers with the appropriate admission forms and funding agreements, together with other documentation
- Discuss the Early Years Foundation Stage framework (2025) and the daily routine of the nursery
- Early detection of potential health concerns and developmental delays including additional support
- To discuss policies and the nursery website
- Look at and record ID seen – eg. birth certificate, passport, adoption certificate
- To confirm start dates and settling in sessions

There is no set time for how long the home visit will typically last, however, we give up to 30 minutes per family. The home visit for some families may need to be longer dependent upon the needs of the child eg with special educational/additional needs, adopted or looked after children or children with medical needs or allergies and intolerances.

To be taken on the home visit are:-

- Admission forms and funding agreements
- Privacy Notice
- 'All About Me' booklet
- Payment form
- Staff must carry a mobile phone
- Staff must take their ID badge
- Toy box from nursery

Home visits are an opportunity for the Manager/Deputy and your child's allocated keyperson to meet your child and to observe the child in their home environment and learn more about what the child's interests are and also to help make the child feel a little more secure on their first session. It is also an opportunity to aid the smooth transition from home to nursery as this can be difficult for children and also parents too.

Should any member of staff have any concerns in relation to the child or family during the home visit, they **MUST** follow The Life Nursery's Child Protection and Safeguarding policies.
